New Outpatient Pediatric Center

A new "Outpatient Pediatric Clinical Research Center" has opened on the second floor of the Ambulatory Care Center, 400 Parnassus Avenue.

The center, the first National Institute of Health supported outpatient clinical research center unit on campus, was set up so that children in need of treatment and/or diagnosis available only through research can obtain it in an outpatient setting, thus eliminating the trauma and high cost of hospitalization. For further information call 666-2755.

Study on Latinos in Mission District

The relationship between quality of life, psychological well-being and acculturation of Latinos living in the Inner Mission District is examined in a recently completed study by an intern in UCSF's clinical and community psychology program at San Francisco General Hospital.

John Lang, PhD candidate in psychology at the Caribbean Center for Advanced Studies in Puerto Rico, conducted the study, based on 270 phone interviews and two small-group workshops.

The results, although not definitive, are a first attempt at getting an idea of what well-adjusted Latinos in the Mission District are like.

The USCF program was established in 1977 for persons completing a doctorate in psychology. It emphasizes work with minority and other underserved populations, and studies the characteristics of minority communities in order to better meet their mental health needs.

Tooth Decay & School Nurses

UCSF has received a $100,000 grant to study school nurse roles in prevention of tooth decay.

The grant, from the Department of Health and Human Services, will be used to study the effect of the school nurse in follow-up services to children who have received dental screenings. Dental decay is the number one health problem of all school children.

The funding will provide dental screenings for 2,000 fifth and sixth graders from Oakland who will be followed up for two months by school nurses. Nursing professional services will be studied and evaluated to determine their effectiveness in processing the children into appropriate dental care, when indicated.

The study is a collaborative effort between the UCSF schools of Nursing and Dentistry, the Dental Health Bureau of Alameda County Health Care Services Agency and the Oakland Unified School District.

Training for Parents Of Disabled Students

The Sex and Disability Unit of the Human Sexuality Program will soon provide training in family life education and social skills development for teachers and parents of disabled students. Priority will be given to those individuals working with either visually or hearing impaired students.

Two separate activities of the project are: Training in Sexuality and Family Life Education, April 3 to 7, 1982 and Social Skills Development Training, February 6 and 7, 1982. For further information contact Carla Thornton, 814 Mission Street, 2nd floor, S.F. 94103, or call 666-1066.

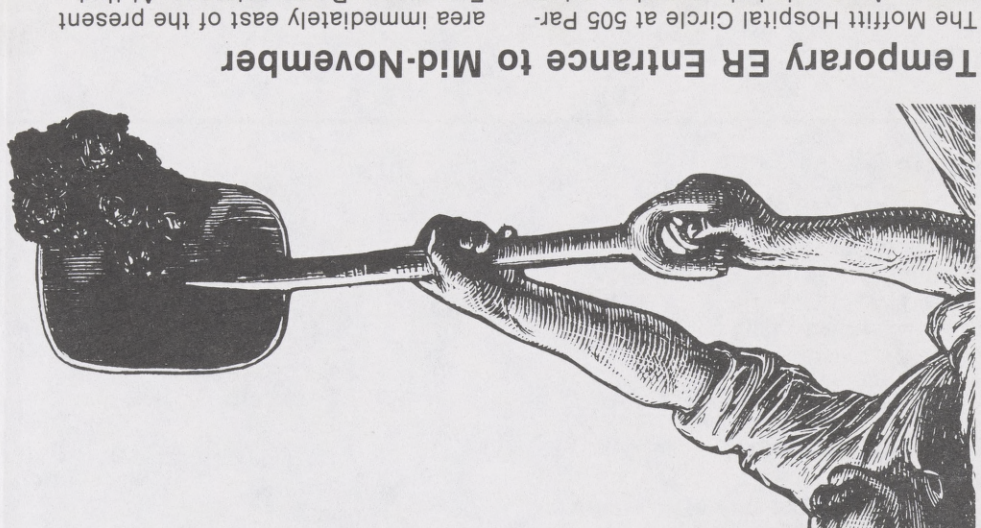
RUSH-TIME DATED
NOVEMBER-DECEMBER 1981

TO OUR NEIGHBORS



Temporary ER Entrance to Mid-November

The Moffitt Hospital Circle at 505 Parnassus Avenue is being used as a temporary Emergency Room entrance due to necessary construction to complete the Moffitt Moderniization. The circle is closed to all foot traffic, and all ambulances are being routed to the Moffitt Hospital Circle entrance, which is reserved for ambulances and autos picking up and unloading patients only. Attendants are on 24-hour duty to help expedite movement of traffic.

In mid-November a new temporary roadway leading into Moffitt Hospital Emergency Room will be opened in the area immediately east of the present Emergency Room entrance. At that time the Moffitt Hospital Circle will be restored to its original use.

During these few weeks, friends of the campus are asked to help avoid congestion of foot traffic and gurneys in the Moffitt Hospital lobby by utilizing other entrances as much as possible, especially the Medical Sciences entrance at 513 Parnassus Avenue, when visiting the campus, and utilizing other elevators when going to the upper floors of Moffitt Hospital.

Picnic Has Large Turnout

Almost 2,000 members of the UCSF campus community, friends and neighbors attended the First Annual UCSF Campus Family Picnic on October 17 in Golden Gate Park.

One of the main events, the "Chancellor's Cup Race," a five-kilometer (three-mile) event, attracted almost 300 novice and seasoned runners, with overall first place going to Steve Scharmann (15:32) and Quita Lopez (18:58), both second year medical students. Both received medals and will have their names engraved on the Chancellor's Cup to be displayed in the Medical Sciences lobby.

Other first place winners were: Eleanor Haas and Fred Dunn, over age 50; Jeanie Jones and Richard Keene, 40-49; Gail Rodd and Mike Conroy, 30-39; Quita Lopez and Steve Scharmann, 16-29; Marua Digiesi and Glen Ceremony, 12-15; and Andrea Smith and Michael Lucaccini, under 12. First, second and third place winners received medals; all competitors who completed the race received free UCSF T-shirts.

Adults and children alike enjoyed games, hot dogs, beer and soft drinks.

Cook Up a Storm

A new cookbook featuring favorite family recipes of ethnic and regional origin now is available for sale as a benefit to raise funds for the UCSF Child Care/Study Center. Compiled by parents and friends, the book sells for $10 ($5 of which is tax deductible). It has recipes for soups, salads, vegetable dishes, entrees and a variety of desserts. It also includes 34 specialty recipes from 26 selected San Francisco neighborhood restaurants.

The cookbook is being sold at the following locations: Child Care Center, 610 Parnassus Avenue (call 666-1616 first), Millberry Union "Bear's Wares," 500 Parnassus, the gift shop of Moffitt Hospital, 505 Parnassus, and "Bear-ly New," the Hospital Auxiliary thrift shop at 1907 Fillmore Street.

Free Health Science Lectures

A series of free health science lectures for the general public will begin in November as a pilot program.

The first lecture is entitled "The Odds of Getting Breast Cancer: An Update and Re-appraisal," by research geneticist Patricia Kelly. It will be held on Wednesday, November 11, 7:30 to 9 p.m. in the Langley Porter Auditorium, 401 Parnassus Avenue.

The second lecture is "Sexual Myths in the 80's: A Critical Update," by a panel comprised of several faculty from UCSF's Human Sexuality Program. It will be held on Wednesday, November 18, 7:30 to 9 p.m., also in the Langley Porter Auditorium.

Talks on recent DNA research will be given in January and February. For further information on this series, sponsored by the Office of Public Service Programs and the Committee on Arts and Lectures, contact Vida Labrie, 666-3206.
